## Product Data Sheet

Western blot analysis of CD289 expression in mouse spleen (A), rat spleen (B) whole cell lysates. (Predicted band size: 109; 114; 115; 118 kD; Observed band size: 135 kD)

Immunohistochemical analysis of CD289 staining in rat spleen formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
