

## **Product Data Sheet**

## **STAT1 Blocking Peptide**

| Catalog #             | Source    | Reactivity                                                                            | Applications                                          |  |  |  |
|-----------------------|-----------|---------------------------------------------------------------------------------------|-------------------------------------------------------|--|--|--|
| CBP2110               | Synthetic | H, R, B, D, Mk, P, Rb, S                                                              | BL BL                                                 |  |  |  |
| Description           | The       | peptide is used to block An                                                           | nti-STAT1 Antibody (#CPA2110) reactivity.             |  |  |  |
| Form                  | Lyop      | hilized powder                                                                        |                                                       |  |  |  |
| Gene Symbol           | STAT      | 1                                                                                     |                                                       |  |  |  |
| Alternative Na        | ames Sign | Signal transducer and activator of transcription 1-alpha/beta; Transcription factor   |                                                       |  |  |  |
|                       | ISGF      | -3 components p91/p84                                                                 |                                                       |  |  |  |
| Entrez Gene           | 6772      | 6772 (Human)                                                                          |                                                       |  |  |  |
| SwissProt             | 015       | 350 (Human)                                                                           |                                                       |  |  |  |
| Purity                | >859      | 6                                                                                     |                                                       |  |  |  |
| Quality Contro        | ol The    | The quality of the peptide was evaluated by reversed-phase HPLC and by mass           |                                                       |  |  |  |
|                       | spec      | trometry.                                                                             |                                                       |  |  |  |
| <b>Directions for</b> | Use Bloc  | Blocking Peptide to the diluted primary antibody in a molar ratio of 10:1 (peptide to |                                                       |  |  |  |
|                       | antil     | oody) and incubate the mix                                                            | xture at 4°C for overnight or at room temperature for |  |  |  |
|                       | 2 ho      | urs.                                                                                  |                                                       |  |  |  |
| Storage/Stabi         | lity Ship | ped at 4°C. Store at -20°C fo                                                         | for one year.                                         |  |  |  |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish
