

## **Product Data Sheet**

## hsa-miR-500a-3p miRNA Inhibitor

reconstitution.

| Catalog #             | Source            | Reactivity              | Applications   |
|-----------------------|-------------------|-------------------------|--|
| CIH0301               | Synthetic         | н                       |  |
| Description           | Synth             | etic miRNA inhibitors   | are used to inhibit hsa-miR-500a-3p by transfaction.     |
| Specificity           | miRN              | A Inhibitors are chen   | nically synthesized, complementary, antisense            |
|                       | single            | -stranded oligonucle    | otides to their target, endogenous mature miRNA. It      |
|                       | effect            | ively prevents the ta   | get miRNA to bind to normal cellular binding sites.      |
|                       | Trans             | ection of inhibitors f  | ollowed by downstream gene expression analysis or        |
|                       | pheno             | otypic analysis, is per | formed to elucidate the targets and roles of particular  |
|                       | miRN              | As.                     |  |
| Form                  | Lyoph             | ilized powder           |  |
| Gene Symbol           | hsa-m             | niR-500a-3p             |  |
| Accession No.         | MIMA              | T0002871                |  |
| Components            | This s            | ynthetic miRNA is ba    | sed on the mature miRNA sequence. It does not contain    |
|                       | the fu            | ll precursor miRNA s    | tem-loop.  |
| <b>Directions for</b> | Use We re         | commend re-suspen       | ding the lyophilized synthetic miRNA using DNase and     |
|                       | RNase             | e-free ddH2O. To mal    | se a 100 uM stock, dissolve the lyophilized powder using |
|                       | 100 u             | l of ddH2O.             |  |
| Storage/Stabi         | <b>lity</b> Shipp | ed at 4 °C. Store at -2 | 0 °C for one year. Avoid freeze-thaw cycles after        |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC- Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish

## **COHESION BIOSCIENCES LIMITED**
