

## **Product Data Sheet**

## hsa-miR-539-5p miRNA Inhibitor

| Catalog #      | Source        | Reactivity                | Applications   |
|----------------|---------------|---------------------------|--|
| CIH0319        | Synthetic     | Н                         |  |
| Description    | Syn           | thetic miRNA inhibitor    | s are used to inhibit hsa-miR-539-5p by transfaction.    |
| Specificity    | miF           | NA Inhibitors are cher    | nically synthesized, complementary, antisense            |
|                | sing          | gle-stranded oligonucle   | otides to their target, endogenous mature miRNA. It      |
|                | effe          | ectively prevents the ta  | rget miRNA to bind to normal cellular binding sites.     |
|                | Trai          | nsfection of inhibitors   | ollowed by downstream gene expression analysis or        |
|                | phe           | notypic analysis, is per  | formed to elucidate the targets and roles of particular  |
|                | miF           | RNAs.                     |  |
| Form           | Lyo           | philized powder           |  |
| Gene Symbol    | hsa           | -miR-539-5p               |  |
| Accession No.  | MIN           | MAT0003163                |  |
| Components     | This          | s synthetic miRNA is ba   | sed on the mature miRNA sequence. It does not contain    |
|                | the           | full precursor miRNA      | tem-loop.  |
| Directions for | <b>Use</b> We | recommend re-susper       | nding the lyophilized synthetic miRNA using DNase and    |
|                | RNa           | ase-free ddH2O. To ma     | ke a 100 uM stock, dissolve the lyophilized powder using |
|                | 100           | ) ul of ddH2O.            |  |
| Storage/Stabi  | lity Shij     | oped at 4 °C. Store at -: | 20 °C for one year. Avoid freeze-thaw cycles after       |
|                | rec           | onstitution.              |  |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish
