

## **Product Data Sheet**

## hsa-miR-219a-1-3p miRNA Inhibitor

| Catalog #      | Source        | Reactivity              | Applications                                               |
|----------------|---------------|-------------------------|------------------------------------------------------------|
| CIH0522        | Synthetic     | н                       |                                                            |
| Description    | Syn           | thetic miRNA inhibite   | ors are used to inhibit hsa-miR-219a-1-3p by transfaction. |
| Specificity    | miF           | RNA Inhibitors are cho  | emically synthesized, complementary, antisense             |
|                | sin           | gle-stranded oligonuc   | leotides to their target, endogenous mature miRNA. It      |
|                | effe          | ectively prevents the   | arget miRNA to bind to normal cellular binding sites.      |
|                | Tra           | nsfection of inhibitor  | followed by downstream gene expression analysis or         |
|                | phe           | enotypic analysis, is p | erformed to elucidate the targets and roles of particular  |
|                | miF           | NAs.                    |                                                            |
| Form           | Lyo           | philized powder         |                                                            |
| Gene Symbol    | hsa           | -miR-219a-1-3p          |                                                            |
| Accession No.  | . Mi          | MAT0004567              |                                                            |
| Components     | Thi           | s synthetic miRNA is l  | based on the mature miRNA sequence. It does not contain    |
|                | the           | full precursor miRNA    | stem-loop.                                                 |
| Directions for | <b>Use</b> We | recommend re-susp       | ending the lyophilized synthetic miRNA using DNase and     |
|                | RNa           | ase-free ddH2O. To m    | ake a 100 uM stock, dissolve the lyophilized powder using  |
|                | 100           | ) ul of ddH2O.          |                                                            |
| Storage/Stabi  | lity Shi      | pped at 4 °C. Store at  | -20 °C for one year. Avoid freeze-thaw cycles after        |
|                | rec           | onstitution.            |                                                            |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish
