## CDX2 siRNA (Human)

Reactivity	Applications				
-					
siRNA to inhibit CDX2 expression using RNA interference					
CDX2 siRNA (Human) is a target-specific 19-23 nt siRNA oligo duplexes designed to					
knock down gene expression.					
Lyophilized powder					
CDX2					
Alternative Names CDX3; Homeobox protein CDX-2; CDX-3; Caudal-type homeobox protein 2					
1045 (Human)					
Q99626 (Human)					
> 97%					
Oligonucleotide synthesis is monitored base by base through trityl analysis to ensure					
appropriate coupling efficiency. The oli	he oligo is subsequently purified by affinity-solid				
phase extraction. The annealed RNA duplex is further analyzed by massspectrometry to verify the exact composition of the duplex. Each lot is compared to the previous lot by mass spectrometry to ensure maximum lot-to-lot consistency.ComponentsWe offers pre-designed sets of 3 different target-specific siRNA oligo duplexes of human CDX2 gene. Each vial contains 5 nmol of lyophilized siRNA. The duplexes can 					
			be transfected individually or pooled together to achieve knockdown of the target		
			gene, which is most commonly assessed by qPCR or western blot.

CDX2 siRNA (Human) - C	5 nmol x 1	5 nmol x 2
Negative Control	2.5 nmol x 1	2.5 nmol x 2
DEPC Water	1 ml x 1	1 ml x 2

**Directions for Use** 

We recommends transfection with 10 nM - 100 nM siRNA 48 to 72 hours prior to cell lysis. Before resuspending, briefly centrifuge the tube to ensure the lyophilized siRNA is at the bottom of the tube. Resuspend the siRNA oligos to an appropriate concentration with DEPC water. For example, resuspend one tube of 5 nmol siRNA oligo in 250  $\mu$ l of DEPC water to get a final concentration of 20  $\mu$ M.
